### DETAILED ACTION

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**. Claims 1-23 are pending.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-11, 22 and 23, drawn to a method for continuous production of Hepatitis A *virus* and a cell culture, classified in class 435, subclass 235.1.
  - II. Claims 12-23, drawn to a method for isolating complete Hepatitis A virus *particles* and a cell culture, classified in class 435, subclass 235.1.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are drawn to different methods that produce different products. The method of Group I produces virus. The method of Group II produces virus particles. A virus is not a virus particle. Therefore, the outcomes of the two methods are distinct, requiring different materials to produce a virus and a particle.

Because these inventions are distinct for the reasons given above and the literature search required for Group I is not co-extensive for Group II, and therefore burdensome, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1648

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
